

This is a detail sheet illustrating an option on how to layout and cut this particular joint. This entry includes the following:

This is a primary and fundamental joint.

The intent is to use our frame drawings to gather the right lengths and then when it comes time to laying out joinery you refer to these. Mortise and tenon joints are signified by tenon thickness, tenon length, housing depth, and qty of diameter pegs. I.e.: 2/4/1-(2)1" means 2" thick tenon x 4" long w/ a 1" deep housing and (2) 1" dia. Pegs.

WORKING TO:
3/4" UNDER NOMINAL
JOINERY 2" OFF REFERENCE FACE

TYPICAL POST JOINT - SQUARE RULE

Scale: 1" = 1' - 0"

JOINT GROUP: **SQUARE RULE**
